Backend Developer | PHP (Laravel) & Node.js | 7+ years
Zielona Góra, Lubuskie, Poland

Стислий огляд

Backend developer with 7+ years of experience building and scaling server-side systems. I work primarily with PHP (Laravel) and Node.js, and I'm comfortable picking up whatever the task requires — whether it's outside my core stack or not. Recently led the full architectural rethinking of a cloud platform: decomposed a monolithic system into isolated modules, introduced a multi-tenant Vendor layer, built API key management with lifecycle and quota control, and laid the foundation for a usage-based billing system. Also set up Docker-based deployments, GitLab CI/CD pipelines, and designed the system for future Kubernetes scaling. I'm results-driven. Colleagues know me as someone who always finds a way forward — even when the solution requires going beyond the familiar. Open to Senior Backend Developer or Tech Lead roles. Remote. Based in Poland. Stack: PHP · Laravel · Node.js · PostgreSQL · MySQL · Docker · REST API · GitLab CI/CD · Git
